## MIKE2.0 F2F at SemTech 2010

There will be a face-to-face session on MIKE2.0 and its semantic enterprise offering at the upcoming Semantic Technology Conference 2010. This F2F session on MIKE2.0 will be at 4:45 PM – 5:45 PM on Thurs, June 24. The conference, which expects 1200 attendees or so, is in its sixth year and is being held at the Hilton Union Square in downtown San Francisco on June 21-25, 2010.

27 May

I will be leading the session and offering a few introductory remarks and slides. After that, we are hoping for a lively discussion and Q&A session on MIKE2.0 and its applicability to information development projects. While the emphasis will be on the semantic enterprise, given the broad usefulness of MIKE2.0, all topics will be fair game!

If any MIKE2.0 aficionados or practitioners are in the area, please attend and contribute. And, if you just simply want to learn more and meet others using the methodology, please drop by and join in the discussion.

Hope to see you there!
